

Security Telco Systems

Our subsidiary company europEL - Security Communication Division offers in co-operation with our partner B&K GmbH:

- Personal security systems Funktel

- DECT phones with security functions (localisation, emergency button, attack detection), paging systems, integration of voice, data and message services into existing alarm systems.

- Our solution is suitable in that places where the safety plays the most important role - in prisons, factories, mines, hospitals or rest homes.

- Localisation pendants (f.e. for hospitals, rest homes, court houses, ...)
